

This program is a bot designed to check internet speed. If the internet speed is found to be below a declared values by internet provider, the bot will tweet the name of the internet provider with internet speed values.

The bot performs the following steps:

Open Chrome: It opens a Chrome browser and navigates to <https://www.speedtest.net/>.

Perform Speed Test: It initiates an internet speed test and collects the results.

Process Results: It processes the collected data to determine the download and upload speeds.

Check Speeds: If the recorded speeds are below the predefined thresholds set by the internet provider, it triggers the next step.

Tweet via API: The bot connects to Twitter/X using its API and tweets the name of the internet provider along with the speed test results.

```
Tweeting...
download speed: 80.57
upload speed: 26.73
internet_provider Orange
